User Journey Diagram

User journeys describe at a high level of detail exactly what steps different users take to complete a specific task within a system, application or website. This technique shows the current (as-is) user workflow, and reveals areas of improvement for the to-be workflow. (Wikipedia)

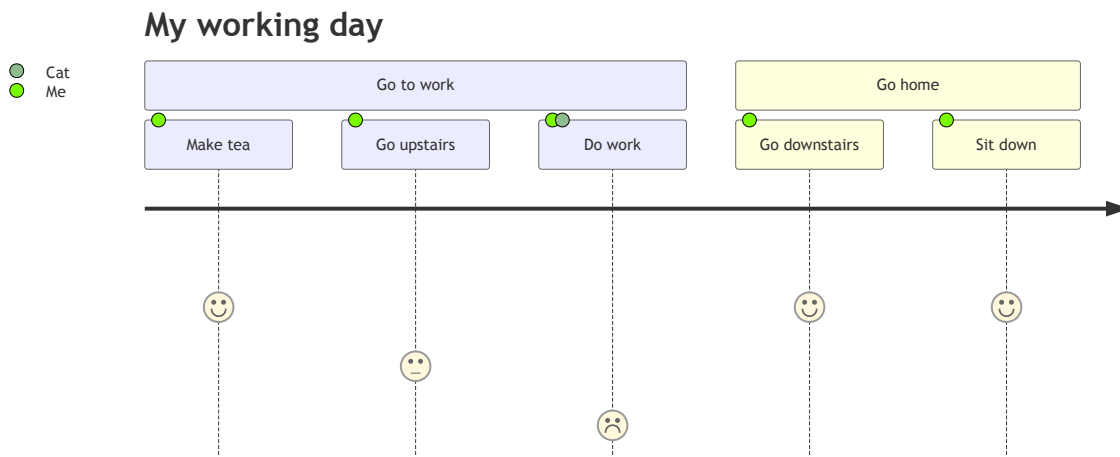

Mermaid can render user journey diagrams:

Code:

mermaid

```
journey
  title My working day
  section Go to work
    Make tea: 5: Me
    Go upstairs: 3: Me
    Do work: 1: Me, Cat
  section Go home
    Go downstairs: 5: Me
    Sit down: 5: Me
```

⌘ + Enter | [Run ▶](#)

Each user journey is split into sections, these describe the part of the task the user is trying to complete.

Tasks syntax is **Task name: <score>: <comma separated list of actors>**

Score is a number between 1 and 5, inclusive.
